Scientific interests

Dr. Lebedev is one of the leading Russian scientists working in the field of mammalian genome structure, functioning and evolution. He started research in the field in the early nineties. Since establishing Russian State program “Human Genome”, Dr. Lebedev with other young scientists from Eugene Sverdlov’s lab joined the program among the first participants. In these years Yuri Lebedev’s research was focused on functional mapping of distinct human chromosomes.

Scientific societies’ membership

Dr. Lebedev became HUGO member in 1996.

Titles

Professor

Doctor of Science (Biological sciences)

Grants and projects

2020–2022	Genotype T cells’ repertoire interaction during development of antiviral immune response
2015–2019	-Изучение динамики системы клеточного адаптивного иммунитета при флавивирусной инфекции
2017–2020	-
